## Lesson 11: More About Similar Triangles

## Classwork

## Exercises

1. In the diagram below, you have $\triangle A B C$ and $\triangle A B^{\prime} C^{\prime}$. Use this information to answer parts (a)-(d).

a. Based on the information given, is $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$ ? Explain.
b. Assume the line containing $B C$ is parallel to the line containing $B^{\prime} C^{\prime}$. With this information, can you say that $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$ ? Explain.
c. Given that $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$, determine the length of side $\overline{A C^{\prime}}$.
d. Given that $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$, determine the length of side $\overline{A B}$.
2. In the diagram below, you have $\triangle A B C$ and $\triangle A^{\prime} B^{\prime} C^{\prime}$. Use this information to answer parts (a)-(c).

a. Based on the information given, is $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$ ? Explain.
b. Given that $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$, determine the length of side $\overline{A^{\prime} C^{\prime}}$.
c. Given that $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$, determine the length of side $\overline{B C}$.
3. In the diagram below, you have $\triangle A B C$ and $\triangle A^{\prime} B^{\prime} C^{\prime}$. Use this information to answer the question below.

Based on the information given, is $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$ ? Explain.

## Lesson Summary

Given just one pair of corresponding angles of a triangle as equal, use the side lengths along the given angle to determine if the triangles are in fact similar.

$|\angle A|=|\angle D|$ and $\frac{1}{2}=\frac{3}{6}=r$; therefore, $\triangle A B C \sim \triangle D E F$.

Given similar triangles, use the fact that ratios of corresponding sides are equal to find any missing measurements.

## Problem Set

1. In the diagram below, you have $\triangle A B C$ and $\triangle A^{\prime} B^{\prime} C^{\prime}$. Use this information to answer parts (a)-(b).

a. Based on the information given, is $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$ ? Explain.
b. Assume the length of side $\overline{A C}$ is 4.3 . What is the length of side $\overline{A^{\prime} C^{\prime}}$ ?
2. In the diagram below, you have $\triangle A B C$ and $\triangle A B^{\prime} C^{\prime}$. Use this information to answer parts (a)-(d).

a. Based on the information given, is $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$ ? Explain.
b. Assume the line containing $\overline{B C}$ is parallel to the line containing $\overline{B^{\prime} C^{\prime}}$. With this information, can you say that $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$ ? Explain.
c. Given that $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$, determine the length of side $\overline{A C^{\prime}}$.
d. Given that $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$, determine the length of side $\overline{A B^{\prime}}$.
3. In the diagram below, you have $\triangle A B C$ and $\triangle A^{\prime} B^{\prime} C^{\prime}$. Use this information to answer parts (a)-(c).

a. Based on the information given, is $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$ ? Explain.
b. Given that $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$, determine the length of side $\overline{B^{\prime} C^{\prime}}$.
c. Given that $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$, determine the length of side $\overline{A C}$.
4. In the diagram below, you have $\triangle A B C$ and $\triangle A B^{\prime} C^{\prime}$. Use this information to answer the question below.

Based on the information given, is $\triangle A B C \sim \triangle A B^{\prime} C^{\prime}$ ? Explain.
5. In the diagram below, you have $\triangle A B C$ and $\triangle A^{\prime} B^{\prime} C^{\prime}$. Use this information to answer parts (a)-(b).

a. Based on the information given, is $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$ ? Explain.
b. Given that $\triangle A B C \sim \triangle A^{\prime} B^{\prime} C^{\prime}$, determine the length of side $\overline{A^{\prime} B^{\prime}}$.
